FLOWETHIX

Protecting Data and Water –Intelligentiy

FlowEthix - Protecting Data and Water - Intelligently

Company Overview

FlowEthix is a Texas-based environmental technology and consulting firm that helps data centers and AI infrastructure eliminate water waste through patented cooling innovation and sustainability advisory. Our system combines intelligent airflow control, greywater reuse, and sludge filtration with environmental audits and ESG compliance support. We offer site evaluations, design support, licensing, and grant collaboration for early deployments.

Core Capabilities

- Smart, water-saving cooling systems for AI workloads
- Greywater reuse integration and microbial control
- Environmental consulting and ESG compliance advisory
- Patent-backed technology licensing and retrofit design
- Performance tracking and sustainability reporting

About the Founder

Joshua W. Hill, MBA, PMP is the inventor and founder of FlowEthix. With over a decade of leadership in industrial safety, engineering systems, and market development, Joshua has launched high-impact technologies across mining, petrochemical, and data infrastructure. He holds an MBA, PMP certification, and has authored the patent-pending system behind FlowEthix.
